Application/Control Number: 09/889,791

Art Unit: 1772

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, drawn to a laminate, classified in class 428, subclass 40.1.
- II. Claims 12-15, drawn to a resins composition, classified in class 521, subclass 50.
- 2. III. Claims 16-17, drawn to an article, classified in class 428, subclass 343.
- 3. Claims 16-17 link(s) inventions group I and group II. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claims 16-17. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.
- 4. Inventions group I and group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are unrelated because the resin composition comprises an epoxy resin and/or a modified silicone resin and is deemed to be distinct from the laminate of group I.

Application/Control Number: 09/889,791 Page 3

Art Unit: 1772

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

- 6. During a telephone conversation with Mr. John W. Bailey on September 3, 2002 a provisional election was made with traverse to prosecute the invention of group I, claims 1-11 and group III, claims 16-17. Affirmation of this election must be made by applicant in replying to this Office action. Claims 12-15 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.
- 7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- 8. (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 9. Claims 1-3 and 16-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Akada (5,304,418).

Akada relates to a laminate comprising a substrate (1), a radiation-curable pressure sensitive adhesive (PSA) layer (2), and an adhesive layer (3), which are laminated sequentially (abstract and figure - 1). The substrate can be plastic (col. 2, lines 54-60). The PSA looses adhesive power when exposed to radiation (col. 3, lines 7-9). The adhesive (3) can be thermosetting (col. 4, lines 43-46). The laminate can be formed into an article when bonded to chips and allows for reusing the laminate.

The intended use phrase "capable of" has not been given any patentable weight as it is not directed to a positive limitation but only requires its ability to do so.

Art Unit: 1772

ø

10. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 11. Claims 1-11 and 16-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Aizawa (5,609,954) in view of Akada.

Aizawa relates to a strippable PSA laminate comprising a substrate (col. 4, lines 46-50) and a PSA layer that loose its adhesively upon exposure to energy (abstract). The PSA can include forming agents and additive such as crosslinkers (col. 3, lines 26-65). The forming agent can include heat-expandable particles (col. 3, lines 66-67). However, Aizawa fails to teach the presence of an adhesive layer over the PSA layer. Akada, as discussed above, teaches the advantage of providing an adhesive layer over the PSA layer for fixing the separated chips to an adherand while keeping well-balanced adhesion and release properties (col. 3, lines 11-14). Therefore, it would have been obvious to one having ordinary skill in the art to utilize Akada's teaching of using an adhesive layer over the PSA layer in the invention of Aizawa.

Further, with regard to claim 9, the presence of additional PSA layer and substrate on the other side of adhesive layer would have been obvious based on duplication of parts.

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nasser Ahmad whose telephone number is 703-308-4424. The examiner can normally be reached on Monday-Thursday from 7:30 am to 5 pm, and on alternate Friday.

Application/Control Number: 09/889,791 Page 5

Art Unit: 1772

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Harold Pyon can be reached on 703-308-4251. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9310 for regular communications and 703-872-9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0661.
